

CUSTOMIZED CLINICAL ASSISTANTS' TRAINING PROGRAM FOR ORGANIZATIONS

Prabuddhaa Integrated Wellbeing Academy offers a comprehensive Clinical Assistants' Training Program tailored to meet the unique needs of your organization. Our program provides essential instruction in the roles and responsibilities of Clinical Care Assistants, equipping them with the skills and knowledge needed to excel in their roles.

Key Features of our Training Services:

Comprehensive Curriculum: Our program covers a wide range of topics, including body structure and function, infection prevention, nutrition, principles of growth and development, safety in healthcare, home health care, and care of the older person. Participants receive instruction and hands-on practice in basic patient care skills essential for Clinical Care Assistants.

Placement Services: We offer placement services to assist participants in securing employment opportunities upon completion of the program. Our extensive network of healthcare providers ensures that graduates have access to rewarding career opportunities in private and government hospitals, nursing homes, NGOs, healthcare systems clinics, and community health centers (CHCs).

Hands-On Training: Participants will practice supervised basic patient care in a clinical setting, ensuring they are well-prepared to meet the demands of their role. From patient assistance with activities of daily living to vital sign measurement and communication skills, our program provides practical experience to reinforce learning.

Enhanced Patient Delight: By allocating non-nursing tasks to trained Clinical Assistants, nurses can focus more on patient-oriented care, enhancing patient satisfaction and overall healthcare outcomes. Our program aims to alleviate nursing shortages and reduce nursing burnout by providing dedicated support staff trained to deliver high-quality care.
